MACHINING SERVICES

**HUB CITY
IRON WORKS**

Hub City Iron Works specializes in the design, manufacture and repair of oilfield equipment and tubulars, with facilities throughout the USA. The main manufacturing facility, based in Broussard, LA uses top-of-the-line equipment including CNC Lathes, CNC Mills, and honing machines, all set in a modern 52,000 sq-ft, air conditioned building producing products that are operational around the world.

While the company's focus is "downhole tools", it also manufactures products for industries outside of Oil & Gas.

By utilizing its extensive state of the art equipment, along with experienced personnel, Hub City Iron Works is able to deliver unbeatable quality, service and customer satisfaction.

MACHINING CAPABILITY:

1. CNC Turning

Turning Diameter: Up to 35.4"

Turning Length: Up to 120"

Spindle Bore: Up to 12.6"

2. CNC Milling - 3 & 4 Axis

Part Length: Up to 120"

Part Width: Up to 31.89"

Part Height: Up to 29.53"

Weight: Up to 6,600 lbs

3. Honing

Honing Diameter: 1.9"-11.5"

Stroke Length: 15'

4. Phosphating

Pipe: Up to 6-5/8" Range 3

Parts: 17"(H) x 120"(L) x 17"(W)

5. Accreditations

API 7-1-0520: Threader

API 7-1-0520: Manufacturer of
Kelly Valves & Drillstem Products

API 5CT-1126: Threader

Standard Products

- 'PD' Dual acting Hydraulic-Mechanical Drilling Jars
- 'PD' Dual acting mechanical Drilling Energizers
- 'PD' Shock Tools
- Fishing Jars
- Fishing Energizers
- Bumper Subs (up to 40" stroke)
- Safety Joints
- Kelly Valves
- Crossovers
- Bit Subs
- Float Subs
- Top Drive Subs
- Saver Subs
- Side Entry Subs (Integral)
- Side Entry Subs (two piece)
- Circulating Subs
- Anchors. Mechanical
- Anchors. Hydraulic
- Running Tools
- Whipstock Systems
- Fishing Mills (Window, Follow, Watermelon type, etc.)
- Swages
- Stabilizers (Integral Blade)
- Stabilizers (Sleeve Type)
- Stabilizers (Non Rotating)
- Pup Joints
- Running Tools
